

UNCOVERING COUNTERFEITS

Cheaply made clone products can cost you time and money. To save you both, review the following differences we have found in counterfeit versions of our products. Stick to authorized sales channels, and remember that if a deal seems too good to be true, it probably is.

Contact us with your serial number if you suspect a fake contact GAC for help.

GENUINE GAC

- ✎ Actuators and Speed Controllers label formats are the same
- ✎ GAC logo displays at the top
- ✎ Made in Agawam MA, U.S.A. will always on label
- ✎ High-quality components, seals, connectors, and workmanship is the reason you buy GAC

- ✎ No GAC logo
- ✎ Never a bar code
- ✎ Look for misspelled or incorrect naming
- ✎ Low quality connectors and seals

Most GAC products have no back panel, you see the electronics board clearly through a protective coating.

Fake product backs may show a wiring diagram - GAC does not print it here.

BOX serial numbers show two bar codes.

Serial number labels will never look like this.

If you do NOT see a Hologram Sticker on an electronics unit, assume it is a fake.

SOME OF THESE THINGS ARE NOT LIKE OUR PRODUCTS, SOME OF THESE THINGS JUST DON'T BELONG.....

Although GAC is doing all it can, we will never be able to stop companies that want to sell what we design and make. Although it might seem to save money on the first price, in the long term the headaches and potential for damage to engines and life are not worth the price. Call us for help with identifying any units you think are counterfeit.
